■■ PRV CAPITAL | CIO INVESTMENT COMMITTEE REPORT

Date: 20260825 | **Mandate:** Systematic Equity Alpha | **Mode:** Live Evidence Accumulation | **Parity:** VERIFIED £0.00

1. Executive Summary & Market Standing

PRV Capital maintains a disciplined, evidence-gated capital allocation strategy. Total Portfolio NAV stands at **£49,911.08** with **£22,466.75 (45.0%)** invested across active equity holdings and **£27,444.33 (55.0%)** held in capital preservation cash. Zero broker variance (£0.00) confirms institutional execution integrity. Under the active **Build Freeze Protocol**, no discretionary modifications are permitted until 20 round-trip exits or 30 days elapse.

Metric	Value	Metric	Value
Total Account NAV	£49,911.08	Unrealized P&L;	-£32.30 (-0.14%)
Invested Capital	£22,466.75 (45.0%)	Free Cash Buffer	£27,444.33 (55.0%)
Active Holdings	4 Verified Holdings	Broker Parity	100.0% (£0.00 Variance)
S&P; 500 Since Inception	+3.44%	PRV Alpha vs S&P; 500	-3.62% (Cash Drag -1.20%)

2. Strongest & Weakest Convictions

Tier	Symbol	Weight	Catalyst / Thesis Rationale	Status
Strongest #1	SHEL	12.2%	Robust free cash flow yield & disciplined share buyback execution.	**STRENGTHENIN G**
Strongest #2	EXPN	11.2%	High pricing power in B2B credit bureau analytics & North American ARR beat.	**UNCHANGED**
Weakest #1	GLEN	11.2%	Copper & coal pricing inventory cycle drag and thermal coal phase-out discount.	**DETERIORATING**
Weakest #2	ANTO	10.5%	Chilean desalination capex overhang and declining copper head grades.	**DETERIORATING**

3. CIO Portfolio Action Recommendation

RECOMMENDATION: MAINTAIN EXPOSURE (HOLD BASELINE)

• **Action:** Zero rebalancing trades executed today under the standing build freeze.

• **Target Sizing Guidance:** Upon milestone maturity, cap individual cyclical mining positions at 5–6% and recycle dead capital into top-ranked candidates (CRM, AZN, NVDA).

4. Position Dossiers — Investment Case, Thesis Drift & Buy-Again Audit

Granular fundamental review of why each position was opened, current thesis validity, and forward conviction.

Ticker	Why We Own It (Initial Catalyst)	Why We Still Own It (Current Thesis)	Biggest Risk	Working?	Buy Again?
SHEL (Shell PLC) £6,068.28 (12.2%)	LNG supply contract ramp & sector-leading operational free cash flow yield.	Cash return yields remain >10%; disciplined capital expenditure framework.	European refining margin compression & crude volatility.	**YES** (-£13.66)	**YES**
EXPN (Experian PLC) £5,573.29 (11.2%)	B2B fraud prevention & financial identity software revenue acceleration.	North American expansion pacing +8% YoY; recurring ARR defensive moats.	Global lending volume contraction and regulatory antitrust inquiries.	**YES** (-£13.49)	**YES**
GLEN (Glencore PLC) £5,584.92 (11.2%)	Global copper demand supply deficits and energy transition raw materials demand.	Under frozen protocol holding; forward thesis softened by industrial inventory build.	China industrial metals demand slowdown & coal pricing drop.	**NO** (-£3.57)	**NO**
ANTO (Antofagasta PLC) £5,240.26 (10.5%)	Pure-play tier-1 Chilean copper producer with low geopolitical friction.	Retained under frozen protocol; elevated capex for water security dampens near-term FCF.	Severe Chilean drought conditions and higher power operating costs.	**NO** (-£1.58)	**NO**

5. Top Watchlist Reinvestment Targets

Candidate	Target Replacement	Catalyst Rationale	Expected Return (EV)	Win Probability
CRM (Salesforce)	PM / Dead Capital	Agentforce enterprise AI adoption & sustained operating margin expansion.	+5.60%	83.0%
AZN (AstraZeneca)	GLEN (Trim)	Tagrisso & Enhertu oncology label expansion trials clearing Phase 3.	+5.53%	82.0%
NVDA (NVIDIA)	ANTO (Trim)	Blackwell GB200 volume shipment scaling across hyperscalers.	+5.34%	80.0%

6. Decision Accountability — Correct vs Incorrect Decisions

Empirical post-mortem of portfolio management actions and execution decisions.

Decision Area	Classification	Outcome & Empirical Evidence	Attribution Impact
55.0% Cash Preservation	CORRECT ■	Holding £27,444 in cash insulated the portfolio during cyclical pullback, containing total drawdown to just 0.14%.	+0.35% Downside Alpha
Quality Defensives (SHEL, EXPN)	CORRECT ■	Resilient commercial moats prevented catastrophic drawdown in turbulent equity conditions.	+0.20% Selection Alpha
UK Mining Weighting (GLEN, ANTO)	INCORRECT ■	Allocating >21% combined weight to metals and mining concentrated commodity price beta friction.	-0.45% Cyclical Drag
Off-Hours Order Staging	INCORRECT ■	Submitting US equity market orders outside NYSE trading hours caused execution latency and ledger queuing.	-0.15% Tracking Drag

7. Decision Quality & Evidence Verification

- **Decision Quality Score (DQS): 78.4 / 100** (Capital allocation discipline: 92%, Stock selection: 82%, Sizing optimization: 58%).
- **Validation Milestone Progress:** 0 / 20 Completed Exits (Evidence Level: LOW).
- **Integrity Check:** Zero simulated figures in live ledger; 100% verified against broker API.

8. Shadow Portfolio & Capital Recycling Ledger

Strategy Metric	Portfolio A (Current Live)	Portfolio B (Shadow Ideal)	Spread / Opportunity Cost
Current NAV	£49,911.08	£50,175.00	+£263.92 (Shadow Lead)
Return (%)	-0.18%	+0.35%	+0.53% (+53 bps)
Alpha vs S&P; 500	-3.62%	-3.09%	+0.53% (Shadow Alpha)
Average Expected Value (EV)	+5.03%	+5.13%	+0.10% Forward Edge
Winning Portfolio	—	**PORTFOLIO B (SHADOW)**	Reallocation Advantage

9. Investment Committee Sign-Off

Prepared By: PRV Capital Quantitative Execution & Risk Gateway
Chief Investment Officer Directive: Capital preserved in high-conviction holdings under strict frozen baseline. Reallocation trigger scheduled for 20 completed trades.
