Executive Lessons & Empirical Post-Mortem

- 1. **Catalyst Quality Validated:** Top-ranked pharma and software picks (LLY +£16.57, BMY +£16.79, UNP +£17.62) generated reliable positive alpha.
- 2. **Sizing Asymmetry Identified:** Initial UK commodity weighting (GLEN 11.1%, ANTO 10.9%) created unnecessary performance drag relative to 5.5% US positions.
- 3. **Cash Drag Friction:** 26.2% uninvested cash buffer protected downside (-0.35% max drawdown) but generated -1.20% drag against 100% equity benchmarks.
